1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/6/2008 has been entered.

Information Disclosure Statement

2. The information disclosure statements filed 8/20/2003 and 2/27/2008 have been considered and made of record.

Drawings

3. The drawings (Figures 11A and 11B) were received on 2/6/2008. These drawings are acceptable.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

Claims 117-134 define over the prior art of record for the following reasons:

With respect to the reference of Baumann et al., while the reference of Baumann et al. discloses a microfluidic chip device with a cell chamber having a surface with a non-planar element wherein the surface includes a channel in communication with the opening of the non-

planar element, the prior art of record fails to teach or fairly suggest providing the non-planar element on the wall (the smallest dimension defining the device) of the cell chamber and providing a channel in communication with the cell chamber oriented so as to provide a fluid flow with respect to the non-planar element so as to exert a positive fluidic pressure on a cell attached to the surface defining the opening so as to assist in establishing or maintaining a high electrical resistance seal between the cell and the opening.

With respect to the reference of Stett et al., while the reference of Stett et al. discloses a microfluidic chip device with a cell chamber having a surface with a non-planar element wherein the surface includes a channel in communication with the opening of the non-planar element, the prior art of record fails to teach or fairly suggest providing the non-planar element on the wall (the smallest dimension defining the device) of the cell chamber and providing a channel in communication with the cell chamber oriented so as to provide a fluid flow with respect to the non-planar element so as to exert a positive fluidic pressure on a cell attached to the surface defining the opening so as to assist in establishing or maintaining a high electrical resistance seal between the cell and the opening.

With respect to the reference of Owen et al., while the reference of Owen et al. discloses a microfluidic chip device with a cell chamber having a surface with a non-planar element wherein the surface includes a channel in communication with the opening of the non-planar element, the prior art of record fails to teach or fairly suggest providing the non-planar element on the wall (the smallest dimension defining the device) of the cell chamber and providing a channel in communication with the cell chamber oriented so as to provide a fluid flow with respect to the non-planar element so as to exert a positive fluidic pressure on a cell attached to

the surface defining the opening so as to assist in establishing or maintaining a high electrical resistance seal between the cell and the opening.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
